CONTACT

A person wearing a wide-brimmed hat and a teal shirt is seen from behind, working on a traditional wooden loom. The loom is set up outdoors in a high-altitude, arid landscape with mountains in the background. The person is weaving a dark fabric. The scene is captured in a cinematic style with warm, golden light.

All our products are meticulously crafted under the highest quality standards and individually hand-produced by the skilled artisans at Matsu in Zhongshan, China.

For our Nomadic Collection in particular, we place the utmost importance on using only the finest—and above all, fairly sourced—materials from Tibet. Our premium leathers are sourced from the small family-run company Lhayak in Qinghai, ensuring traceability and respect for traditional practices.

The fabrics are handwoven in the vast highlands of the Qinghai-Tibet Plateau, where generations of artisans preserve ancient techniques. We purchase these materials at fair prices—typically five times the rate farmers would receive on the open market—directly supporting local communities and sustainable livelihoods. This commitment to ethical sourcing and exceptional craftsmanship defines every piece in our collection, blending timeless heritage with modern design.

A person is sitting on a modern, modular outdoor sofa in a grassy field. The sofa is composed of several large, rectangular cushions in shades of blue and grey. The person is wearing a dark jacket and a hat. In the background, there are rolling hills and a cloudy sky. The overall scene is serene and natural.

About us & our Products

Matsu Europe & ME is a young German startup driven by a passion for innovative, timeless furniture that seamlessly blends functionality with modern aesthetics. Founded with the vision of bringing exceptional design to everyday living spaces, we collaborate closely with established partners to deliver pieces that inspire and endure.

Our exclusive partner is Matsu, a premium furniture manufacturer based in China with an outstanding reputation since 1997. Matsu works with renowned international designers and upholds the highest standards in craftsmanship, material selection, and production quality. Every piece reflects meticulous attention to detail, sustainable practices, and a commitment to excellence that has earned Matsu trust among discerning customers worldwide.

Together, KVN Design and Matsu create furniture collections that combine bold German design innovation with masterful Chinese manufacturing expertise—resulting in premium products that elevate interiors with elegance, comfort, and lasting value.

Boxwork - Digital Nomad Workstation

The Boxwork Workstation redefines the modern workspace with its intelligent, nomadic-inspired modular design that seamlessly adapts to the rhythms of contemporary digital life, combining a robust yet elegantly minimal structure of felt, wood, and metal with versatile sit-stand height functionality, integrated storage solutions, and thoughtful ergonomic details — creating a refined, distraction-free environment that empowers focus, creativity, and flexibility whether placed in a home office, co-working space, or remote retreat, while quietly honoring sustainable craftsmanship and the spirit of mobility that defines the entire Nomadic Collection.

Details:

 SIT & STAND HEIGHT

 FELT, WOOD, METAL

Tagliato Chairs

The Tagliato with armrests brings the signature “cut” design of the series into a more functional version. Seat, legs and backrest are precisely shaped – inspired by the deliberate pruning of a plant. The short armrests are fixed to the chair legs and give the piece additional character. At the same time they are highly practical: the chair can be hung on the edge of a table so that it floats above the floor – ideal for everyday cleaning. The ergonomic backrest ensures lasting comfort. A chair without rigid boundaries – suitable for offices, meeting areas and refined living spaces.

Bowler Chairs

3 OPTIONS:

- WOODEN FRAME
- STEEL FRAME
- SINGLE FRAME 360°

GABRIEL FABRICS

The Bowler by Matsu is a sculptural seating piece that masterfully unites expressive form with ergonomic comfort. Designed by award-winning Belgian designer Joeri Reynaert, Bowler boasts a soft, curved silhouette that supports a relaxed, balanced posture while making a striking visual impact in modern interiors.

Elevated by a continuous frame and available in three distinctive base options — a warm four-leg wooden frame, a sleek four-leg metal frame, or a single central swivel base — Bowler flexes between settings and personalities. Whether configured with a natural wood base for residential serenity, a refined metal base for contemporary spaces, or a central swivel for dynamic lounges and hospitality environments, the design remains cohesive and refined.

Panache Sofa

The PANACHE SOFA — a truly versatile statement piece that enriches any space with timeless modern refinement, perfectly suited for discerning residential interiors and sophisticated contract environments alike.

LHAYAK

YAK LEATHER AND WOOL

Lhayak in Tibet is a leading manufacturer of durable yak leather, known for its exceptional strength, density, and traditional processing from hides of high-altitude yaks in the Himalayan region.

Ecological Yak Hair

Hand-woven yak hair (mainly black and gray)

C-P-MN-01

- 1.Yaks from alpine regions are shorn once a year, with good elasticity and not easy to deform.
- 2.It is a natural fiber that does not contain harmful chemicals to the human body and can be biodegradable.
- 3.The color is natural and simple. The natural color of yak hair is mostly black, dark brown, or black and white mixed.
- 4.The hand-woven texture has regional differences, showing the local cultural characteristics of Tibetan areas in China.

C-L-A-50

Redefine the level of genuine leather:
Breaking through the traditional "perfect and flawless" standard, emphasizing natural beauty and uniqueness that reduces waste, and improves resource utilization.

Environmental protection of ecological yak cow leather:
The Higg MSI from October 2024 shows that cow leather's environmental impact has dropped by 55-67% and its GWP by 60%, making leather a sustainable choice. Additionally, yaks help the environment by not harming grass roots, spreading grass seeds, and their manure enriches the soil. Yak skin processing uses eco-friendly, non-chromium methods to boost efficiency, cut waste, and maintain quality. In addition, yak skin is a sustainable, durable, and biodegradable material.

The entire series of Eco-nomadic products have won LWG certification.

MATSU

WEBBINGS, WOODS, STONES

Matsu is a prominent Chinese office furniture manufacturer headquartered in Shanghai since 1996, specializing in high-end, sustainable office solutions through partnerships with leading German brands and its own award-winning original designs.

MATSU

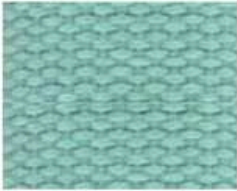

Webbing for Link

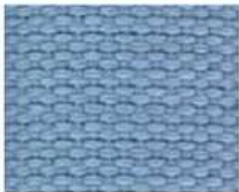

Wine red L-N-Z-01

Orange L-N-Z-02

Water green L-N-Z-03

Sky blue L-N-Z-04

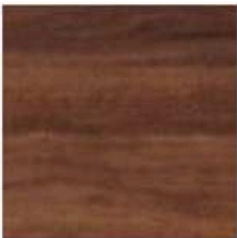

Purple L-N-Z-05

The main component of the braided strap is dacron material, which is a blend of polyester and cotton. It has the advantages of high strength, good wear resistance, strong wrinkle resistance, low water absorption, and easy cleaning and maintenance.

Wood

Walnut C-W-B-01

White ash C-W-B-07

Beech C-W-B-09

1.The solid wood materials are mainly produced in North America and Europe. They belong to medium-to-high hardness wood with high stability and durability.
2.Wood is a renewable, naturally degradable, and natural raw material. Solid wood has a certain recycling and reusable value after being discarded.

3.The raw wood materials are all sourced from sustainably managed forests and meet FSC certification.
4.MFC boards have the advantage of easy processing and are not prone to cracking and deformation due to changes in environmental humidity.

Sintered Stone

Shaloran black C-Y-06-01

Apyana carrara whiteC-Y-06-02

New armani grey C-Y-06-04

Sintered stone has good scratch and wear resistance, high temperature resistance, and extremely low water absorption, so it is very convenient for cleaning and maintenance.
