MATSU

MATSU

Established in 1996, MATSU is dedicated to providing inspiring office furniture overall solutions for clients.

Replying on this craftsmanship spirit as a key to international stage, MATSU entered into strategic cooperation with famous German furniture brand. While introducing excellent European designs into China, MATSU is fully aware of the importance in original design made by itself. So it gradually improves its design ability. MATSU collaborates with many famous design institutes, for the purpose of creating furniture that is featured by original MATSU style.

Inspiring Office Lifestyle

LANGCHAN SOFA

Langchan

Solid wood frame, environmentally friendly and durable

Rubber footing, protecting products and floor materials

Flexible combination, space can be arranged in a variety of ways to match different Spaces

To meet the needs of sustainable development in modern society and more and more flexible and convenient forms of expression

DETAILS

Oil wax skin

Oil wax leather is a kind of cowhide leather making process, which needs to be separated from the ordinary cowhide production process in the water plant process. The main difference is the tanning stage, ordinary cowhide mainly uses chrome tanning, vegetable tanning, aldehyde tanning, etc. Oil wax skin is used oil tanning, after leather tanning and dyeing, the leather is soft, good elasticity, good air permeability, large tension. At the same time, the vacuum drying process in the process makes the oil wax skin also have the characteristics of not easy to mildew.

It has strong water and oil absorption, and the color of the skin surface will become darker when it sticks to the part after water and oil. In fact, it is these characteristics of oil wax skin that make it give people a feeling of nostalgia and vicissitudes. When the leather is stretched, there will be a change in color, and such products are more prone to scratches when scratched by hand, which is also the most special point of oil wax skin.

DETAILS

Leather and cloth, cross stitch

Yak skin and cloth covered with high elastic sponge, comfortable to sit on, excellent vision. Cross stitching is used at the junction of the surface leather cloth, which can connect the two materials well, making it strong, durable, safe and reliable.

DETAILS

1/3

Golden ratio Two-tone matching

The dividing line of each module is about 1/3. The golden ratio is used to guide visual changes and enrich the beauty of details of the product.
