MATSU

MATSU

Established in 1996, MATSU is dedicated to providing inspiring office furniture overall solutions for clients.

Replying on this craftsmanship spirit as a key to international stage, MATSU entered into strategic cooperation with famous German furniture brand. While introducing excellent European designs into China, MATSU is fully aware of the importance in original design made by itself. So it gradually improves its design ability. MATSU collaborates with many famous design institutes, for the purpose of creating furniture that is featured by original MATSU style.

Inspiring Office Lifestyle

WRANGLER

POSITION

The design is simple and pays attention to the refined use of lines. The novel modern form expression not only has its unique sense of form, but also meets the needs of various scenes. In order to be more free and casual space theme, the horse stool can provide exclusive visual and psychological driving in any corner, and the increase of interactivity tempts users to have a practical experience.

PRODUCT OVERVIEW

Functional design for riding sitting position
Selected yak skin texture, oil wax skin technology, refined the texture
of the vicissitudes of the retro mood
The metal bracket takes advantage of the simplicity and lightness of the lines
to highlight the modern feel of the product
The meticulous curved wooden base allows you to wander in a relaxed atmosphere
A fresh new office experience that creates a free place for every office scenario

DETAILS

Riding posture

The saddle shaped curved seat captures the curve of the posture when riding a horse to form a very dynamic use posture. Switch postures and adjust physical and mental conditions for long-term sedentary office workers.

DETAILS

Elastic sponge, leather surface

The surface of the seat is made of skin-friendly, breathable leather. Leather and internal elastic sponge fully guarantee the user's comfort when using.

DETAILS

Oil wax skin

Oil wax leather is a kind of cowhide leather making process, which needs to be separated from the ordinary cowhide production process in the water plant process. The main difference is the tanning stage, ordinary cowhide mainly uses chrome tanning, vegetable tanning, aldehyde tanning, etc. Oil wax skin is used oil tanning, after leather tanning and dyeing, the leather is soft, good elasticity, good air permeability, large tension. At the same time, the vacuum drying process in the process makes the oil wax skin also have the characteristics of not easy to mildew.

It has strong water and oil absorption, and the color of the skin surface will become darker when it sticks to the part after water and oil. In fact, it is these characteristics of oil wax skin that make it give people a feeling of nostalgia and vicissitudes. When the leather is stretched, there will be a change in color, and such products are more prone to scratches when scratched by hand, which is also the most special point of oil wax skin.

DETAILS

High-density rebound sponge filling

The sponge has high density, small voids inside, large mass, and super resilience and air permeability. The shape is full and stylish, which strongly supports and relaxes the body muscles, and rebounds the feeling of sitting.

DETAILS

Curved solid wood base

In the radian design of the base, the selection of materials takes into account the safety and durability in the use process. The range of tilt is controlled by the preset radian, which ensures the user can swing slowly and gently within the safe range

Simple styling

It is presented in a simple form, with beautiful lines and a unique sense of form. The product itself increases interactivity and gives users a better experience

DETAILS

Metal bent bracket

The use of metal bent pipe for structural support, excellent workmanship, stable structure. Metal materials ensure that the product achieves a safe and reliable use experience on the basis of simple form.

FAB

(WRANGLER) FAB
